

## KERMATH SALES AND SERVICE

**Precision alignments:** Sim Net prides itself in having an experienced staff that can accurately align a Kermath Therapy Simulator to equal or exceed the original manufacturer specifications.

**Relocations:** Sim Net can relocate your Kermath Therapy Simulator, with minimal down time to your facility. Sim Net can also temporarily relocate your Kermath Therapy Simulator so you avoid a costly short-term rental. Sim Net has all of the necessary rigging equipment, tools, shipping dollies and insurance coverage to safely relocate your Kermath Therapy Simulator. Sim Net will provide room-planning assistance to insure that the simulator room layout is designed to meet both patient and staff needs. Room planning assistance includes working directly with the customer, architects, general contractors and sub contractors for a smooth installation. Contact us for details.

**OEM Parts:** Sim Net maintains the world's largest supply of original equipment manufacturer specified replacement parts for Kermath Therapy Simulators.

**Refurbishments:** Sim Net can refurbish and extend the life of your Kermath Therapy Simulator. We will meet or exceed all of the original manufacturer specifications and include a one-year parts and labor warranty. Contact us for details.

**Leases:** Sim Net offers short and long-term leases on Kermath Therapy Simulators. Contact us for details.

**Sales:** On our remanufactured Kermath Therapy Simulator with new peripherals we include a one-year parts and labor warranty and a one-year service maintenance agreement. (USA only)

**Purchasing:** We are always looking to purchase used Kermath Therapy Simulators. Contact us for details.

**Service:** Our service department currently supports 200 Kermath Therapy Simulators either in or outside the USA, with service maintenance agreements, emergency service, or replacement parts. We can handle any service problem that you may have on a Kermath Therapy Simulator.

**Other Services:** We can provide a remanufactured replacement patient table, table vertical bearing retrofit, even replacement tabletops. We have the ability to match your Kermath Therapy Simulator digital readouts to any accelerator digital readouts. We can also supply your department with an array of x-ray equipment from a variety of manufacturers such as: high frequency generators, lasers, image intensifiers, x-ray tubes, cameras, fluoro monitors, and x-ray grids. Contact us for details.
